Engineering Solutions for Complex Projects

At PLC Construction, Inc. (PLC), we deliver high-quality, turnkey solutions for electrical and control systems projects. Our team ensures seamless execution from start to finish, providing expertise in project management, craft labor, material storage, and equipment handling.

Project Scope

- **Fabrication of 10 Electrical Racks**
  Designed and built to meet rigorous industry standards.
- **Integrated Components**
  - **UPS-7011**
  - **RIO-7011**
  - **RP-7012 Panel**
  -

The **UPS and RIO** will be provided by the client and installed by our trusted fabricator. The **RP-7012 panel** will also be built and installed by our fabricator, ensuring precision and reliability.

Included in Our Price

- Installation of equipment and cables as shown on the issued drawings
- Modifications to starters as specified in the bid documents
- Installation of starters on the rack
- Storage of the completed units for up to 1 year

Why Choose Us?

- **Comprehensive Project Management** – From planning to delivery, we manage every detail.
- **Expert Craft Labor** – Skilled professionals dedicated to quality and safety.
- **Efficient Material & Equipment Handling** – Secure storage and streamlined coordination.
- **Collaborative Approach** – Working closely with stakeholders to meet timelines and expectations.
